Profile

Full Stack Software Engineer with 6 years of hands-on experience building production-grade applications using the MERN stack (MongoDB, Express.js, React, Node.js). Specialized in scalable Industry 4.0 and IoT solutions using AWS cloud infrastructure, microservices architecture, Docker containerization, TypeScript, REST API design, and modern DevOps practices. Experienced in delivering end-to-end applications from requirements gathering to production deployment.

Skills & Frameworks

- **Programming Languages:** JavaScript (ES6+), TypeScript, C#, Python, C++
- **Frontend:** React, Next.js, Redux, Zustand, Material UI, Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, Express.js, NestJS, REST APIs, Microservices Architecture
- **Databases:** MongoDB, PostgreSQL, MySQL, SQL Server
- **Cloud & DevOps:** AWS, Docker, Docker Compose, GitLab CI/CD, Linux Administration
- **IoT & Embedded:** Raspberry Pi, Linux (Ubuntu, Raspbian), System Configuration
- **Testing:** Jest, React Testing Library, Mocha, Chai
- **Tools:** Git, Visual Studio Code, Postman, Bruno, MongoDB Compass, Figma, JIRA, Monday
- **Others:** RESTful APIs, JSON, XML, API Gateway, Yarn, NPM, Webpack

Languages

Spanish (Native) | English (Fluent)

Work Experience

KNESYS PLUS | Apr 2019 - Present

Software Engineer | Zapopan, Jalisco, Mexico

Full-stack development of enterprise web applications and IoT solutions for multiple industries including data centers, construction, events, and access control. Developed microservices-based architectures, REST APIs, and responsive web platforms.

ConBoleto - Event Ticketing & Management Platform

- Architected RESTful microservices for dual-platform system (organizer + customer).
- Implemented multiple payment gateway integrations (Stripe, Lklpay).
- Built seat selection engine, QR code generation, and real-time inventory management.
- Configured GitLab CI/CD pipelines for automated deployments across dev, testing, and production.
- Designed flexible RBAC system with public and authenticated endpoints.

Technologies: Node.js, NestJS, MongoDB, Stripe, Lklpay, React, Docker, SeatsIo API.

Checkton - Construction Workforce Management (IoT Platform)

- Developed responsive React application for real-time worker tracking and compliance.
- Implemented Redux/Zustand for complex state management.
- Built dashboards for biometric attendance, IMSS/SAT compliance.

Technologies: React, Redux, Zustand, REST APIs.

DataCenter & FaceDN - IoT Monitoring Solutions

- Built microservices for Raspberry Pi gateways managing network configuration, file system encryption, and LED status indicators.
- Integrated GPS and Motorola RF communication APIs.
- Developed facial recognition camera communication with cloud sync.

Technologies: Node.js, Docker, Linux, IoT, AWS, GPS, RF, Biometric systems.

Freelance Experience | Aug 2024 – Present Intermittent

Delivered custom web solutions for diverse clients using React and Next.js.

Invertuneles - Agricultural Solutions Corporate Website (Apr-Jul 2025)

- Built multilingual corporate site (Spanish/English) with Next.js 16+.
- Implemented i18n, SEO optimization, and WhatsApp integration.
- Developed responsive product catalog with video integration.

Technologies: Next.js 16+, React, TypeScript, i18n, SEO optimization, email integration, WhatsApp API.

Transportes Colimenses - Logistics & Freight Corporate Website (Aug-Sept 2024)

- Developed comprehensive website with Next.js 14+ for freight company.
- Built multi-section responsive site with optimized images.
- Integrated external client portal for package tracking and shipment management.

Technologies: Next.js 14+, React, TypeScript, responsive design, external portal integration.

Jabil | Nov 2018 - Apr 2019

Software Test Engineer | Zapopan, Jalisco, Mexico

Automated manufacturing processes through web application development and provided technical support to production teams.

- Developed dynamic web applications for product validation using ASP.Net Core Framework, HTML, JavaScript, and CSS, enhancing accuracy and reducing validation time by 40%.
- Implemented and managed OsTicket application for production line support requests, improving response times and customer service.
- Updated and maintained existing PHP applications and processed XML data for system integrations.
- Provided hands-on technical support to manufacturing teams, troubleshooting production blockers.

Technologies: C#, ASP.NET Core, PHP, JavaScript, HTML/CSS, XML, OsTicket, Git

Pounce Consulting | Aug 2016 - Nov 2018

Support Engineer | Guadalajara, Jalisco, Mexico

Started as technical support engineer and transitioned to software development role after 6 months, developing validation applications for electronic meter manufacturing.

Application Development & Automation

- Developed .NET applications (WinForms) for validation and testing of electronic meters.
- Built graphical user interfaces for production line validation and automation.
- Maintained and enhanced existing validation applications based on production needs.

Database Management & Reporting

- Designed and managed databases using SQL Server and MySQL to support application development.
- Generated CSV reports from SQL Server using custom SQL queries for production analysis.
- Utilized Entity Framework for data access layer development.

Customer Support & On-Site Services

- Provided technical support to manufacturing teams across multiple locations.

Technologies: C#, .NET Framework, WinForms, Entity Framework, SQL Server, MySQL, Git, SVN, Mercurial

Education

Universidad Autónoma de Guadalajara UAG

Master's, Computer Science

2020 - 2022

Zapopan, Jalisco, Mexico.

CETI

Bachelor's, Electronic engineering

2012 - 2016

Guadalajara, Jalisco, Mexico.
